

PASSF

1.10.3

1/6/88

Pasco Landfill RI/FS Scoping Meeting

January 6, 1988

AGENDA

I. Discuss Existing Data

Results of most recent Field Investigation Report by Ecology and Environment versus results of previous investigations.

II. Identify Data Needs

- a) Characterize contamination plume
- b) Identify sources of contamination
- c) Characterize migration pathways
- d) Identify potential receptors

III. Identify Issues for Sampling and Analysis Plan

- a) Quality Assurance Project Plan
 - o appropriate analytical levels (*detection limits*)
 - o QA/QC procedures required to meet Data Quality Objectives
- b) Field Sampling Plan
 - o sample matrix
 - o number of samples
 - o frequency of sampling
 - o constituents analyzed
- c) Identify Preliminary List of ARARs
 - o contaminant specific MCLs
 - o site specific considerations

IV. Identify Potential Remedial Action Alternatives

- a) No action, continue to monitor
- b) Pump and treat groundwater
- c) Removal of source and pump and treat groundwater
- d) *Biological treatment*
